// ABOUT ME

I am a goal-driven engineer with strong trouble shooting and communication skills. I always set goals to design a more efficient and optimal architecture. And as a leader, I leads people and taught myself by achieving goals. I am very adaptable, so I can handle of an unexpected situation quickly. I constantly learn, do, and share what I have learned with my team so that everyone can grow together.
Growing up as a solutions architect is my long-term goal.
